

# CS122 Class 19: Research through Design

James Pierce, Counterfactual Objects

# Class 18 agenda

- Zipcrit
- Seminar: RtD & Strong Concepts
- Seminar: Being the Machine & The Tilting Bowl
- Studio: Project work time (+ implementation consulting)

# Seminars

# Project work time

- After your Figma evaluation on Wednesday, you will be expected to make a Minimum Viable Product (MVP) of a depth prototype - pick the most important “creation” aspect and prototype it all the way through
  - No canned responses, handles actual user inputs
- Things to consider
  - Tech stack (I suggest web technologies to use existing JS libraries)
  - Testing - mobile vs desktop (if mobile, have to deploy website and open it on mobile, or Swift/Android app?)
  - If using LLM assistance, does everyone in the group agree what is ‘ethical’ usage?
- I’ll walk around and consult with each group.
- I can also explain my paper prototype feedback if you have questions.

# Class 19 recap

- TODOs
  - WoZ in class eval Weds 4/8!
- Next week
  - PM5 + RRs due Monday; seminar from Alyssa & PJ
  - RRs due Weds; seminar from Sultan & Ben
  - Reminder: 4 individual RRs are dropped!
