

# CS140 - Group Assignment 7

Due: Friday, Mar. 24 at 8pm

1. Revisit Problem 1 from Assignment 7. If you wanted to actually generate the solution, i.e., how to actually break up the string into words:
  - (a) What additional information would you need to store?
  - (b) Once you finish filling in the table(s), how would you actually generate the solution?
2. Work through the first test case for Assignment 8 by hand. What is the minimum penalty and how should the text be broken?
3. What CS courses are you hoping/planning to take next semester? Any questions about classes/major requirements?
4. Group participation Was everyone in the group at the meeting and, if not, who was missing?
5. Optional: submit a group photo :)
