

CS140 - Group Assignment 6

Due: Friday, 10/18 at 10pm

1. Write your own checkpoint question for the upcoming midterm. Estimate how long you think it should take one of your classmates to solve your question.
2. Work through a couple of examples for assignment 6 by hand for use in debugging your code. E.g., walkthrough example 1 at the end of the assignment and come up with one other one.
3. What did everyone do for fall break?
