

CS140 - Group Assignment 6

Due: Friday, March 1 at 10pm

1. How did the checkpoint go for everyone in the group? What was the most confusing question?
2. Write your own checkpoint question on material that was covered before the first checkpoint. Estimate how long you think it should take one of your classmates to solve your question.
3. Work through a couple of examples for assignment 6 by hand for use in debugging your code. E.g., walkthrough example 1 at the end of the assignment and come up with one other one.
4. Spring break plans?
