

CS 51P – Fall 2023

Lecture 20

1. *Without using classes* write a program that implements the 5-day shirt matching simulation.
2. Using the class Person with methods `get_shirt_color`, `get_name`, and `change_shirt` write a program that implements the 5-day shirt matching simulation.

3. Implement the following class Person

```
class Person:  
    SHIRT_COLORS = ("red", "green", "blue", "yellow")  
  
    def __init__(self, person_name, shirt_color = "blue"):  
  
        def get_shirt_color(self):  
  
        def get_name(self):  
  
        def change_shirt(self):  
  
    def __str__(self):
```
